Subject: New Login to CITI Training Program

The UCF Office of Research and Commercialization (ORC) utilizes the Collaborative Institutional Training Initiative (CITI) program for UCF employees (learners) participating in sponsored research who are required to complete training in areas such as animal care and use (IACUC), conflict of interest (COI), export compliance (EC), human subjects research (IRB), and responsible conduct of research (RCR). The CITI program is also available to any UCF employee or affiliate (including faculty, staff, students, researchers, technicians, laboratory personnel, etc.) interested in enhancing their knowledge in ethics and regulatory requirements and best practices in the conduct of research. As a registered user, UCF provides this program at no cost to UCF learners.

Effective April 8, 2015, an easier way to access CITI will be available through a UCF-based portal at <http://citi.research.ucf.edu>.

Learners will simply enter their UCF NID credentials to login from the UCF portal directly to the CITI website. The new single sign-on process adds considerable security to the web-based training experience by securing the authentication of each UCF learner. Look for the interactive CITI icon for single sign-on access.

For instructions on how to register for applicable training requirements visit the following ORC Ethics & Compliance websites: Conflict of Interest (COI), Export Compliance (EC), Institutional Review Board (IRB), Responsible Conduct of Research (RCR), and Office of Animal Welfare (IACUC).

For additional information, please contact the applicable ORC program via email:

COI: coi@ucf.edu

IACUC: iacuc@ucf.edu

IRB: irb@ucf.edu

RCR: rcr-ucf@ucf.edu
